in this collection the authors put forth different philosophical conceptions of hacking education in response to the educational societal and technological demands of the 21st century teacher educators are encouraged to draw on the collection to rethink how hacking education can be understood simultaneously as a praxis informed by desires for malice as well as a creative site for us to reconsider the possibilities and limitations of

teaching and learning in a digital era how do we hack beyond the limits of circumscribed experiences regulated subjective encounters with knowledge and the limits imposed by an ever constrained 21st century schooling system in the hopes of imagining better and more meaningful futures how do we foster ingenuity and learning as the end itself and not learning as economic imperative in a world where technology in part positions individuals as zombie like and as an economic end in itself can we hack education in such a way that helps to mitigate the black hat hacking that increasingly lays ruin to individual lives government agencies and places of work how can we as educators facilitate the curricular and pedagogical processes of reclaiming the term hacking so as to remember and remind ourselves that hacking's humble roots are ultimately pedagogical in its very essence as a collection of theoretical and pedagogical pieces the chapters in the collection are of value to both scholars and practitioners who share the same passion and commitment to changing challenging and reimagining the script that all too often constrains and prescribes particular visions of education those who seek to question the nature of teaching and learning and who seek to develop a richer theoretical vocabulary will benefit from the insightful and rich collection of essays presented in this collection in this regard the collection offers something for all who might wish to rethink the fundamental dynamics of education or as morpheus asks of neo in the matrix bend the rules of conventional ways of knowing and being

crack the code and get fluent faster i had to learn a new language in a handful of days for a tv interview i asked benny for help and his advice was invaluable tim ferriss what if you could skip the years of study and jump right to speaking spanish sound crazy no it's language hacking it's about learning what's indispensable skipping what's not and using what you've learned to have real conversations in spanish from day one unlike most traditional language courses that try to teach you the rules of a language language hacking spanish shows you how to learn and speak spanish immediately through proven memory techniques unconventional shortcuts and conversation strategies perfect by one of the world's greatest language learners benny lewis aka the irish polyglot the method language hacking takes a modern approach to language learning blending the power of online social collaboration and the 80/20 principle of learning benny's ten language hacks show you how to achieve more with less it focuses on the conversations and language that learners need to master right away rather than presenting language in the order of difficulty like most courses this means you can start having conversations immediately

course features each of the 10 units culminates with a speaking mission that you can choose to share on the italki language hacking learner community [italki.com/languagehacking](https://www.italki.com/languagehacking) where you can give and get feedback and extend your learning beyond the pages of the book the audio for this course is available for free on [libraryteachyourself.com](https://www.libraryteachyourself.com) or from the teach yourself library app you don't need to go abroad to learn a language any more

discover the simple way to understand and remember the most groundbreaking concepts in 3 000 years of philosophical thought each idea is broken down into three stages 1 the helicopter view which gives you an introduction to the idea and some context around it 2 the shortcut which gives you the core elements of the theory along with a range of examples that everyone can understand 3 the hack which is a one liner designed to stick in your memory and give you an instant grasp of the concept from pascal's wager to kant's categorical imperative and from camus's existential nihilism to arendt's banality of evil there are 100 concepts explained the perfect introduction to philosophy this is a great new way to learn about the most important philosophical ideas and concepts in a way that makes them easy to recall even months after reading the book

at a time when steve jobs was only a teenager and mark zuckerberg wasn't even born a group of visionary engineers and designers some of them only high school students in the late 1960s and 1970s created a computer system called plato which was light years ahead in experimenting with how people would learn engage communicate and play through connected computers not only did plato engineers make significant hardware breakthroughs with plasma displays and touch screens but plato programmers also came up with a long list of software innovations chat rooms instant messaging message boards screen savers multiplayer games online newspapers interactive fiction and emoticons together the plato community pioneered what we now collectively engage in as cyberculture they were among the first to identify and also realize the potential and scope of the social interconnectivity of computers well before the creation of the internet plato was the foundational model for every online community that was to follow in its footsteps the friendly orange glow is the first history to recount in fascinating detail the remarkable accomplishments and inspiring personal stories of the plato community the addictive nature of plato both ruined many a college career and launched pathbreaking multimillion dollar software products its development impact and eventual disappearance provides an instructive case study of technological innovation and disruption project management and

missed opportunities above all the friendly orange glow at last reveals new perspectives on the origins of social computing and our internet infatuated world

this book argues for the value of digital literacy in the multilingual writing classroom against the background of huge changes in literacy practices prompted by online communication and a growing acceptance of a broader definition of academic literacy that encompasses multimodality the book examines the relationship between digital and print literacies and addresses the design of literacy spaces for multilingual classrooms the author critically evaluates the latest developments in the use of technology in multilingual writing spaces and focuses on the role of teachers in their design it also addresses areas that are not often discussed in relation to multilingual students from blogging to publishing and intellectual property the book will help teachers meet the challenges created by rapidly shifting technology as well as making an innovative contribution to research on multilingual writing classrooms
