recent elections in the advanced western democracies have undermined the basic foundations of political systems that had previously beaten back all challenges from both the left and the right the election of donald trump to the u s presidency only months after the united kingdom voted to leave the european union signaled a dramatic shift in the politics of the rich democracies in anti system politics jonathan hopkin traces the evolution of this shift and argues that it is a long term result of abandoning the post war model of egalitarian capitalism in the 1970s that shift entailed weakening the democratic process in favor of an opaque technocratic form of governance that allows voters little opportunity to influence policy with the financial crisis of the late 2000s these arrangements became unsustainable as incumbent politicians were unable to provide solutions to economic hardship electorates demanded change and it had to come from outside the system using a comparative approach hopkin explains why different kinds of anti system politics emerge in different countries and how political and economic factors impact the degree of electoral instability that emerges finally he discusses the implications of these changes arguing that the only way for mainstream political forces to survive is for them to embrace

a more activist role for government in protecting societies from economic turbulence a historically grounded analysis of arguably the most important global political phenomenon at present anti system politics illuminates how and why the world seems upside down
